

KLN Smart

We took the advice of medical teaching professionals around the country on ways to improve standard anatomy tables to completely restyle and re-engineer our own.

Every feature, from the gas-assisted lift mechanism to the easy-to-use drain handle, is designed to make the unit easier to use, more efficient to maintain, and safer to handle. We've also incorporated other great features like concealed hinges that won't snag operator's clothes or damage doorways. And a tray height that offers a more comfortable working position.

Even our contoured tank makes clean-up easy. Why not examine the components of our heavy duty anatomy tables for yourself—and see why medical schools everywhere are specifying KLN for their teaching facilities!

ABOUT THE COMPANY

Since its founding in 1964, KLN has manufactured and marketed high quality equipment to medical, educational, military and correctional clients and institutions.

We are dedicated to developing products of superior design and construction, and remaining flexible to meet the individualized needs of our clients.

KLN's integration of engineering, sales and production at our San Antonio headquarters provides superior customer satisfaction and quality control.

CONSTRUCTION FEATURES AND OPTIONS

GAS SPRING-ASSISTED LIFT LEVER

Unique lever allows hands-free elevation and retention with gravity latch. Presents tray at optimum work height (on tank models only).

DRAIN LEVER & HEAVY DUTY PAIL

No excessive bending or stooping with our unique "open and close" drain lever handle. The stainless steel 12-qt. pail is standard equipment.

TANK PERIMETER

KLN's tank perimeter is fully radiused for improved handling, easier cleaning and enhanced user comfort.

OPTIONAL HOODED TABLE

Hoods lock to form a vapor-tight seal and can be folded and locked underneath while in use.

HOOD CLOSING LATCH

Latching mechanism tightly secures hoods in the closed positions providing a vapor secure environment for the ATH-93 model.

CABLE SYSTEM

The DT-93 immersion anatomy table features a unique cabling system that makes tray removal and cleanup easy.

EXTRA WIDE TRAYS AND DRAINAGE

The 25" wide tray allows for larger cadavers while providing smooth drainage into the troughs and into the tank.

OPTIONAL BOOK STAND

Our detachable book stands can accommodate even the large medical and anatomy books.

Anatomy tables engineered for learning. That's KLN Smart.

From the minds of the professionals who use them, come KLN's totally new and advanced designs in anatomy immersion dissecting tables.

Easier to use. More efficient to maintain. Safer to handle.
